

Dear Customer,

We thank you for your continued support of our products and take pleasure to inform you that we have been awarded the following items on the

RT13-2011ME CONTRACT

Please don't hesitate to contact us should you have any queries in this regard.

Yours truly,

Brett de Beer

RT13-02-19ME	See Quantity Awarded	Breathing filter of theatre/ICU resuscitation for adult use. Single use bi-directional absolute filter humidifying filter. Provide a total barrier to the passage of bacteria and viruses via the airborne or waterborne routes, including contaminated body fluids. Microbiologically validated against mycobacterium tuberculosis, Pseudomonas species, Serratia marcescens, MS2 virus, Staphylococcus aureus. Hepatitis C virus and human immunodeficiency virus. CE marking approval. Suitable for patient end use only. Single patient, 24 hour change. Bacterial airborne removal efficiency > 99,996 % . Transparent, non-conductive smooth housing profile. Provides optimal humidification for the patient. <input type="checkbox"/> <input type="checkbox"/> Connections - patient end 15 mm ID, 22 mm OD angled, (150 tapers) - circuit end 15 mm OD, <input type="checkbox"/> 22 mm ID. <input type="checkbox"/> Hydrophobic and hygroscopic, low resistance throughout clinical use

Item No	Quantity Required	Description											
RT13-02-23ME	See Quantity Awarded	Breathing filter for use in intensive care anaesthesia. Single use pleated hydrophobic bacterial/viral heat and moisture exchanging filter. Provides a total barrier to the passage of all bacteria and viruses via both the airborne and waterborne routes, including contaminated body fluids. Microbiologically validated against mycobacterium tuberculosis, Pseudomonas species, Serratia marcescens, MS2 virus, Staphylococcus aureus. Hepatitis C virus and human immunodeficiency virus. CE marking approval. Suitable for patient end use only. Single patient, 24 hour change which may be extended to a 48 hour when reulisation is not used. Airborne bacterial removal efficiency > 99,996 % . Liquid borne microbial removal efficiency 100%. Transparent, non-conductive smooth housing profile. Provides optimal humidification for the patient. Water loss is 9,5 mg/l (a) 800 -100 ml tidal volume. Connections - ISO tapers - patient side 15 mm ID + 22 mm OD, circuit side 22 mm ID. □ Low resistance at 60 ml/min approximately 2 cm water.

RT13-12-13-04ME	See Quantity Awarded	<p>Tube laryngeal airway for use proximal to the vocal chords, comprised of a silicone tube, a distal oesophageal occlusion cuff, proximal hyper-pharyngeal cuff and an array of ventilation ports located in the area between the two cuffs. The device shall be designed in such a way that it precludes the possibility of accidental intubation, and consequent occlusion of the airway with the distal tip. The device shall also allow for the simultaneous inflation of both cuffs, and shall furthermore incorporate a 15mm pre-fitted connector, an x-ray opque line down the full length of the tube, a soft non-traumatic tip. The device shall come pre-packed with a bite-block and a pre-calibrated inflation syringe. The device shall be suitable for a minimum of 50 re-uses. Sterilization shall be by means of autoclave at 134 degrees C. □</p> <p>Size: 3</p>
